

Helping Low-Wage Workers Succeed Through Innovative Union Partnerships

ACKNOWLEDGEMENTS

The publication of this report would not have been possible without the support, insight, energy, and hard work of many people in many organizations. The report relied heavily on the research and preparation of Brian Turner of the AFL-CIO Working for America Institute and the Transport Workers Union of America's Community Transportation Development Center, professor Ryan Smith of Rutgers University, and Mark Johnson-Lewis and Jeff Rickert of the AFL-CIO Working for America Institute. Bruce Herman and Howard Wial of the AFL-CIO Working for America Institute contributed their expertise to development of the report. The final version of the report owes a great deal to the work of the Institute's communications staff, Mike Kiernan and Pat Reilly.

We are heavily indebted to the staff and participants of the programs profiled in this report. Without their cooperation and patience, this report would not have been possible. We want to thank especially: Eric Parker, executive director, and Rhandi Berth, director, of the Wisconsin Regional Training Partnership; Caroline Schultz, program director of the Milwaukee Jobs

Initiative; Richard A. Feldman, executive director of the Worker Center, AFL-CIO; Susan Crane, executive director of the Office of PortJOBS; Lisa Rose, project coordinator of the Apprenticeship Opportunities Project; D. Taylor, vice president at large of the Hotel Employees Restaurant Employees International Union; Steven Horsford, chief executive officer of the Culinary Training Academy; and Cheryl Feldman, director, and James T. Ryan, director emeritus, of the Philadelphia Hospital and Health Care District 1199C Training and Upgrading Fund. We would also like to thank Robin Foster of Optima Design Inc. for her work in the production of the report.

We would like to acknowledge the Ford Foundation, and especially program officer John Colborn, who was instrumental in bringing this project to fruition. Ford's support of the project has allowed us to gain a deeper understanding of the successes and challenges of programs working to help people get good jobs and advance to prosperity.

—April 2002
